The undersigned authorizing agent(s) attest to the accuracy of the representations contained herein and hereby certify:

I/We have the full legal authority to authorize flameless cremation, handling, processing and disposition of the decedent's remains and am not aware of any living person who has superior priority right. In the event there is another individual having superior right to execute this form, I, as authorizing agent, have made all reasonable efforts to contact that person, have been unable to do so, and have no reason to believe that the person would object to the cremation of the decedent. The Authorizing Agent further certifies that all persons of equal right have been notified and that no person objects to cremation.

The Authorizing Agent or his/her representative has viewed the remains of the decedent and does hereby certify the identity of the decedent.

If the Authorizing Agent has made specific arrangements for viewing decedent BEFORE flameless cremation, or for a service with the decedent present before flameless cremation, the date and time of service or viewing: \_\_\_\_\_.

Authorizing Agent understands that arrangements must be made with the Funeral Director to remove any valuables or personal possessions prior to the time that the decedent is released to AquaGreen. All items delivered with the decedent to AquaGreen, including jewelry, clothes, shoes, eyeglasses, hair pieces & dental bridgework will be destroyed in the process or otherwise discarded by AquaGreen, at its sole discretion, unless specific instructions are given. Valuables and personal possession instructions: \_\_\_\_\_.

Pacemakers or any other material or implants **do not** have to be removed prior to the process. After the remains are removed from the vessel, all non-consumable materials such as orthopedic implants, dental prosthetics, surgical pins, screws, etc., will be separated and removed from the bone fragments. AquaGreen is authorized to dispose of these materials in a non-recoverable manner.

**AquaGreen Dispositions LLC** is hereby given permission to cremate using alkaline hydrolysis flameless cremation upon receipt of the decedent, at its discretion, and according to its own time schedule, as scheduling permits, without obtaining further authorization or instructions. Flameless Cremation is a breakdown process which uses a gentle circulation of water, temperature, and alkalinity. I authorize AquaGreen to perform the process in a manner in which they deem most appropriate which may include (but not limited to) placing the decedent in the basket / vessel. After the process is completed, the sterile water mixture is returned to the eco-system via the normal wastewater treatment facility, and all that remains is the solid mineral of the bones, which will be processed prior to placement into a container provided by AquaGreen or an urn provided by the authorizing agent. In the event the capacity of the urn/container provided by authorizing agent is insufficient to accommodate all of the flameless cremated remains of the decedent, excess flameless cremated remains will be returned in a temporary container.
